

DIY-Box

Experiment with Plant-e technology and experience how plants produce electricity.

Plant-e offers a DIY-box for educational purposes. With this box you can experience the power of plants for yourself with the whole class!

The box contains materials for 25 plantbatteries, excluding plants.

When these plantbatteries are assembled and linked to each other they provide enough electricity to power an LED light.

For whom:

This DIY-box is fit for everyone from the age of 10. The box is perfectly suitable for classroom use and the higher grades of elementary schools and all levels of high schools and grammar schools.

Content of the box:

- Materials for 25 DIY-kits
- LED light
- Multimeter
- Comprehensive teacher's instructions
- Detailed instructions for the class to assemble the individual DIY-kits

DIY-box @Home

Do you want to experiment with Plant-e in your own home?

The 'DIY at Home' package contains material for 5 plantbatteries, excluding plants. When these plantbatteries are assembled and linked to each other they provide enough electricity to power a LED light.

For whom:

The DIY at Home box is fit for everyone from the age of 10. The box is perfectly suitable for home/individual use.

Content of the box:

- Materials for 5 DIY-kits
- LED light
- Multimeter
- Comprehensive construction and user manual
